attachment nipples, castings and complementary geometries. I also assisted in the design of the central handle for the dumbbell, the geometric shapes which were preferable in an optimum design, and the interlocking components through and including the weighted assemblies.

After a complete review of my involvement I am sure that I contributed to both the conception of the invention and its reduction to practice. I have discussed this matter with Mr. Harms, who is of the same opinion.

This statement is made in accordance with 37 C.F.R. § 1.48(a)(1).

Respectfully submitted,

  
EUGENIO SEGOVIA, JR.
